Database Unreachable:

```
{"dbError":"Problem getting connection:Communications link failure\n\nThe last packet sent successfully to the server was 0 milliseconds
ago. The driver has not received any packets from the server.","orderList":[]}
```

I got this error by removing a character from the jdbc:mysql://cis-linux2.temple.edu:3306 url. I fixed the error by adding the character back to it.

Database Not Authorized:

```
{"dbError":"Problem getting connection:Access denied for user 'tuq44019'@'10.109.104.136' (using password: YES)","orderList":[]}
```

I got this error by removing a character from my database password. I fixed the error by entering the character back into the password.

Syntax Error in SQL Statement:

```
{
  "dbError": "",
  "orderList": [
    {
      "dogID": "",
      "dogTag": "",
      "dogName": "",
      "dogBreed": "",
      "medicalConcerns": "",
      "behavioralConcerns": "",
      "dateofDropoff": "",
      "dateofPickup": "",
      "imageURL": "",
      "webUserID": "",
      "errorMsg": "Database unavailable - please try later or contact your administrator. Error: You have an error in your SQL syntax;
check the manual that corresponds to your MariaDB server version for the right syntax to use near 'FROM dog_info ORDER BY dog_id' at line
1"
    }
  ]
}
```

I got this error by adding a random comma to my SQL statement. I fixed the error by removing the common from the statement.

Error Extracting Data from Result Set (Bad Column Name):

```
{"dbError":"","orderList":
[{"dogID":"","dogTag":"","dogName":"","dogBreed":"","medicalConcerns":"","behavioralConcerns":"","dateofDropoff":"","dateofPickup":"","ima
geURL":"","webUserID":"","errorMsg":"Database unavailable - please try later or contact your administrator. Error: Unknown column 'dog_i'
in 'SELECT'"}]}
```

I got this error by removing a character from one of my column names. I fixed the error by adding the character back to the column name.

Error Extracting Data from Result Set (Wrong Data Type):

```
{
  "dbError": "",
  "orderList": [
    {
      "dogID": "1",
      "dogTag": "MAX-001",
      "dogName": "Max",
      "dogBreed": "bad date in FormatUtils.formatDate: Bullbog. Error: class java.lang.String cannot be cast to class java.util.Date
(java.lang.String and java.util.Date are in module java.base of loader 'bootstrap')",
      "medicalConcerns": "Obesity",
      "behavioralConcerns": "Separation anxiety",
      "dateofDropoff": "09/12/2025",
      "dateofPickup": "09/15/2025",
      "imageURL": "https://images.unsplash.com/photo-esgegasegsohi",
      "webUserID": "1",
      "errorMsg": ""
    },
```

I got this error by changing the format of one of my data sets from String to Date. I fixed the error by changing the format back to String.
